

TOMMASI-MARONESE ENVIROMENTAL POLICY

Environmental awareness is considered by Tommasi-Maronese in the same consideration as the other management aspects ;

for this reason :

- Tommasi-Maronese ensures compliance with current regulation environmental environmental protection;
- Tommasi-Maronese undertakes to periodically evaluate the environmental impact of its activities in order to reduce the consequences or prevent potentially critical situations;
- When developing customer requests, Tommasi-Maronese is committed to providing guidance to customers by identifying and recommending products with a reduced environmental impact;
- When choosing new suppliers, Tommasi-Maronese considers the environmental aspects associated with the production and marketing of the goods purchased as important as the technical and economic aspects, in terms of impact reduction;
- In choosing technologies, equipment and production processes, Tommasi-Maronese undertakes to evaluate their environmental impact and, where possible, reduce it to a minimum;
- The Company Management is responsible for the proper operation, updating and improvement of the Environmental Management System. The Company ensures compliance with the guidelines of the Policy and procedures in force and is responsible for updating them;
- Tommasi-Maronese undertakes to guarantee the specific skills, technologies and financial resources necessary for the Environmental Management System to operate;
- Collaboration with control bodies, authorities and political institutions is based on transparency and mutual trust in order to ensure a flow of communication with all the parties involved;
- All employees and collaborators of the Company shall be informed and trained in relation to their area of competency, with the aim of developing a network of responsibilities concerning environmental issues;
- All employees and collaborators of Tommasi-Maronese shall be familiar with the Corporate Environmental Policy and shall be committed to achieving improvement targets;
- This Environmental Policy is made public by Tommasi-Maronese and is always available for consultation.

In order to achieve these objectives and maintain the Environmental Management System, Tommasi-Maronese undertakes, in a manner compatible with the Corporate objectives and requirements, to:

- reduce the quantity of waste produced and improve differentiated waste collection, favouring recycling as opposed to disposal;
- reduce resource consumption;
- ensure the continuous monitoring of energy consumption and implementation of measures to avoid uncontrolled consumption;
- monitor and reduce, where possible, emissions into the atmosphere by pursuing the policy of using water-based products instead of solvents;
- promote, where necessary, training practices dedicated to environmental issues, with the aim of involving and raising awareness also among suppliers and external collaborators;
- implement and strengthen measures to reduce the risks of accidents that may have an impact on the environment
